SUMMARY

AI Automation Developer with hands-on experience designing and building automated systems for healthcare, e-commerce, and customer service businesses. Delivered order-tracking, invoicing, and AI-powered customer support tools that cut down manual work for operations teams. Skilled in workflow automation, AI integration, and end-to-end system delivery, working from requirements passed down by project leads.

EXPERIENCE

Flow Pilot (Philippines) - On-Call AI Automation Developer

Feb 2026 – Aug 2026

- Engaged to independently build, test, and maintain automated workflows, delivering completed work for review within set deadlines and representing the company professionally on client projects.
- Built an automated order and billing system for a healthcare test-kit company — covering everything from customer order tracking and lab-result delivery to clinic invoicing and payment reminders — cutting down on manual follow-up for the operations team.
- Automated the invoice-handling process for a UK-based company: incoming email invoices are read automatically, checked against purchase orders, and prepared for entry into the accounting system, with any mismatches flagged for staff to review.
- Built an AI customer support chat assistant and a product-management tool for a UK furniture retailer's online store — automating customer Q&A, product publishing, and AI-generated lifestyle photos for new products.
- Built an automated system that collects product details, images, and pricing from furniture brand websites, enriches the data with AI, and organizes it into a shared catalog for the company's product team.

Bataan Peninsula State University — Quality Assurance Office (OJT)

Jan 2026 - Apr 2026

- Supported internal quality audits by managing and monitoring virtual meeting sessions for the audit team.
- Took photos and videos to document office activities and created short video content for the office's social media pages.
- Entered and organized records in the university's document tracking system.
- Completed general administrative tasks assigned by the immediate supervisor.

Echoes of Eldrin (Capstone) - Programmer

Jan 2025 - Oct 2025

- Developed core gameplay systems and combat mechanics in Unreal Engine 5 optimized performance and collaborated with artists on asset integration.

Freelance (Upwork) - QA Tester

2022 - 2025

- Tested mobile apps and games for clients worldwide while maintaining a perfect client satisfaction record; found and reported bugs, performance problems, and usability issues, and worked directly with remote clients to deliver results on time.
 - Designed and built an Android movie-ticket booking app as a freelance project
-

EDUCATION

Bataan Peninsula State University, Philippines

Bachelor of Science in Entertainment and Multimedia Computing - Major in Game Development
2021 - 2026

TECHNICAL SKILLS

AI & Automation:

- n8n, OpenClaw
- OpenAI, Claude
- AI Agents
- Prompt Engineering
- LLM Integration
- Automation Architecture

APIs & Integrations:

- Shopify API
- Stripe, Xero
- GHL, WAHA
- Discord, SMTP
- WhatsApp Business API

Frontend:

- React.js
- Tailwind CSS
- HTML, CSS

Backend:

- JavaScript
- PHP
- Java

Databases:

- MySQL
- Supabase
- SQLite

Tools:

- Railway, Git
- Playwright
- Unreal Engine 5
